

ISOLATERAL INCLINE
TRICEP EXTENSION
JPBT 407

◆ Introducing the Isolateral Incline Tricep Extension, a precision-engineered machine designed to target and strengthen the triceps with unparalleled efficiency. Featuring isolateral functionality, each arm moves independently, ensuring balanced muscle development and reducing strength imbalances. The adjustable incline angle allows for targeted muscle engagement, while the ergonomic handles provide a comfortable and secure grip during workouts.

◆ **DIMENSION:**
Length : 42 inches / 107 cms
Width : 56 inches / 142 cms
Height : 58 inches / 147 cms
Weight Stack : 110lbs / 50kg x
Each Side

◆ **MUSCLE WORKED:**
Triceps Brachii
